# Your client's data. Recovered.

Ontrack® EasyRecovery™ Technician for Windows® allows you to recover your client's data quickly and with minimal effort. Not only does our software include all of the features of the Home and Professional versions, it also has been designed to simplify the data recovery process for technicians.

## Best-in-class Features

- Quick Scan and Deep Scan options allows you to scan efficiently for a fast recovery or perform a more in-depth scan for files which are more challenging to recover.

- Search for deleted files easily in your logical drive by name or type.

- Data recovery from corrupt drives such as hard drive, memory card and USB drive is available with this advanced utility.

- Advanced RAID recovery allows you to recover data from RAID 0, 5 and 6 which is corrupt or unable to be accessed.

- Virtual RAID construction recovery makes it possible to recover data which was lost due to incorrect RAID parameters, or other errors, created during the construction of the RAID.

- Media with bad sectors are recoverable by using our software to create an image of the media with the bad sectors and perform the data recovery from that image.

Ontrack EasyRecovery Technician for Windows is compatible with Windows 10, Windows 8, Windows 7, Windows Vista® and Windows XP®.
