

Your Windows® Data. Recovered.

Ontrack offers a powerful do-it-yourself software for businesses and individuals in need of data recovery for Windows® based media. Ontrack® EasyRecovery™ for Windows is able to recover damaged and deleted files, as well as retrieves data from formatted or corrupted volumes, even from initialized disks. Our easy to use interface allows even the most novice users to recover their data with minimal effort.

Best-in-class Features

- Quick Scan and Deep Scan options allows you to scan efficiently for a fast recovery or perform a more in-depth scan for files which are more challenging to recover.
- Search for deleted files easily in your logical drive by name or type.
- Data recovery from corrupt drives such as hard drive, memory card and USB drive is available with this advanced utility.

Ontrack® EasyRecovery™ Free

Recover up to 1GB for free with Ontrack EasyRecovery Free, a powerful do-it-yourself data recovery software for systems running Microsoft® Windows®. An easy-to-use comprehensive solution for data recovery.

Ontrack® EasyRecovery™ Home

A simple data recovery solution for individuals who have lost irreplaceable data such as digital photos, movies, music and important documents. Recover from any type of media, including mobile phones. Perform unlimited recoveries from local data storage as well as external media.

Ontrack® EasyRecovery™ Professional

Professional grade recovery for lost and deleted files, folders, documents, photos and more. Ontrack EasyRecovery Professional can recover from multiple data loss events like accidental deletion and formatting, including data loss after severe corruption of the hard drive.

Ontrack EasyRecovery Capabilities

Ontrack EasyRecovery is a comprehensive data recovery software solution for Microsoft® Windows® and runs on Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Vista® and Windows XP® operating systems. Recover emails, documents, databases, photos, and multimedia files from local/external hard drives (HDD/SSD), optical discs, and other devices including iPods, tablets, mobile phones that work as a removable storage and disk image files.

A 'Quick Scan' feature lets you scan the target media in less time, allowing for a faster recovery. If your critical files are not listed in the preview after the Quick Scan, a 'Deep Scan' can be selected to continue the search.

Ontrack EasyRecovery Home provides a 'Filtered Tree' option to enable you to sort through your recovered files with ease. You can specify the different file types, whether the file is existing or deleted, and filter by the approximate file size.
