

Ontrack Hosted Erase: Secure erasure made easy

Just register and get started. Deletion, management and certificates of destruction are a breeze with Hosted Erase.

- Centralised web management of all your deletion processes
- Completed erasures of the connected computers and handheld devices are transmitted and recorded
- No need for separate installation or operation of web servers or SQL databases
- Simple online management of expired licences without installation of HASP key or licence manager
- Simple installation of Blancco erase software on the user machines to securely delete data from computers and mobile devices
- Erase client supports Blancco Drive Eraser and Blancco Mobile Diagnostics and Erasure, the leading solutions for secure deletion
- Simply select available erasure options through the erase client

Hosted Erase enables the simple execution and centralised management of all your erasure processes including detailed reports under a common web interface.

Centrally Manage User Rights and Licences

- Centralised administration, control and allocation of user rights
- Administration and control of all used and available licences
- Purchased licences are available for immediate use

Comprehensive Reporting of Erasure Processes

- Management of all the reports for your completed erasures and their processes
- Complete verification of proper erasure of all data in accordance with internal and external policies, laws and regulations
- Reports can be saved as in CSV, PDF and XML format for further processing
